AAOMS Abstract and Poster Scoring Guidelines

Score each application on a 1-5 scale:

5 = Excellent  
4 = Very Good  
3 = Good  
2 = Acceptable  
1 = Not Acceptable

Average scores for all applications will be computed; however, a majority vote by the committee will ultimately determine the presentation status of an application.

Applications receiving a 1 score will most likely not be accepted for presentation.

Oral applications receiving a 2 score will most likely not be accepted, but Poster Applications receiving a 2 score may be considered.

Applications receiving a 3 score will be considered, based on topic and availability.

Applications receiving a 4-5 will be strongly considered for acceptance.

**Review Criteria:**

- The submission contain all of the required aspects:
  1. Clear statement of the problem
  2. Description of the materials and methods employed
  3. Clear explanation of results
  4. Include outcomes data
  5. Relevant conclusion and references

- The submission does not indicate a potential commercial bias or conflict of interest.
